

### INSTRUCTIONS:

Recharge light before using. Avoid letting battery stay empty for long periods of time, as it may shorten battery life.

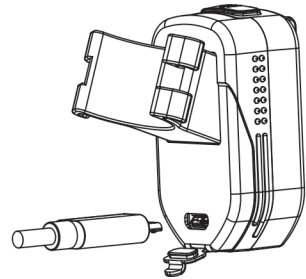

Install to seatpost using included silicone band.

Use power switch to select mode you want to use.

### CHARGING:

Micro-USB cable included. Use it to a powered USB port on a device or to a power bank. If *blue light* does not appear near on/off button, the port might not be powered. Blue light will turn green when fully charged (Should require 4 hrs or less.)
